

## ARTICULATE PRESENTER '09

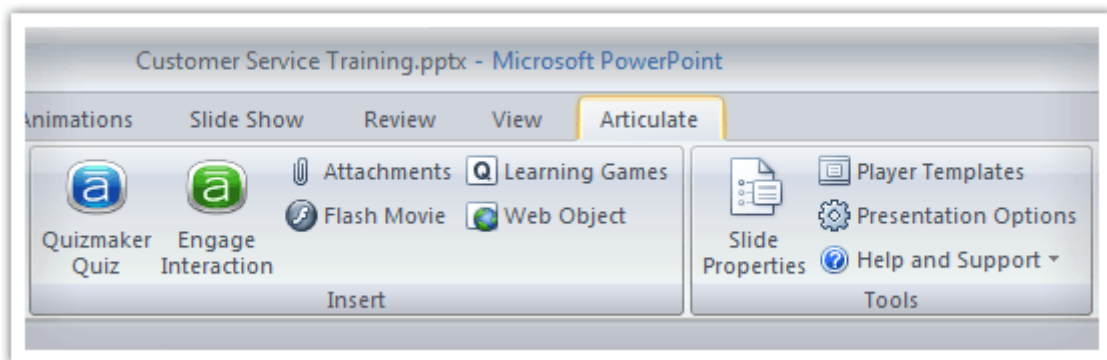

Quickly create Flash-based presentations and e-learning courses from PowerPoint.

Anyone can create engaging Flash presentations and courses with these powerful features.

### Flash authoring in PowerPoint

Transform PowerPoint into a fast and easy Flash-authoring tool. Presenter '09 lets you rapidly create Flash-based presentations and e-learning courses with a tool you already know — PowerPoint.

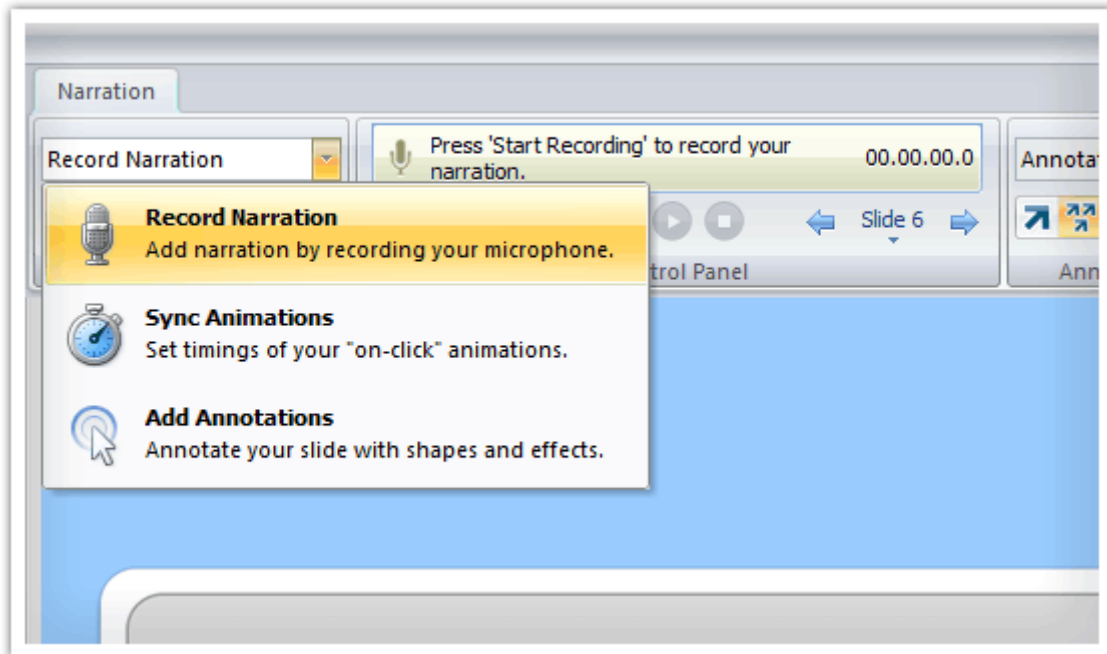

## Record and sync narration

Quickly synchronize the Presenter's voice with slides and animations for a rich learning experience.

Presenter '09 puts everything you need in one exclusive, consolidated workflow.

## One-click publishing to multiple formats

Distribute your content the way you want. Easily create SCORM or AICC compliant content for your LMS. Publish for the Web, CD, and Word and even create an audio podcast — all with a single click.

The screenshot displays a software interface for publishing content. On the left, a vertical menu lists five output formats: WEB (with a globe icon), ARTICULATE ONLINE (with a green circular icon), LMS (with a document icon), CD (with a disc icon), WORD (with a blue 'W' icon), and PODCAST (with a microphone icon). The 'WEB' option is currently selected. To the right of this menu, there are two main configuration sections. The 'Publish Location' section contains a 'Folder' field with the path 'C:\Users\Kristen\Documents\My Articulate Proj'. The 'Properties' section contains four fields: 'Published title' (Customer Service Training), 'Player template' (E-Learning Course (Multi-level)), 'Logo' (comstar logo.jpg), and 'Presenter' (Kristen Morgan).

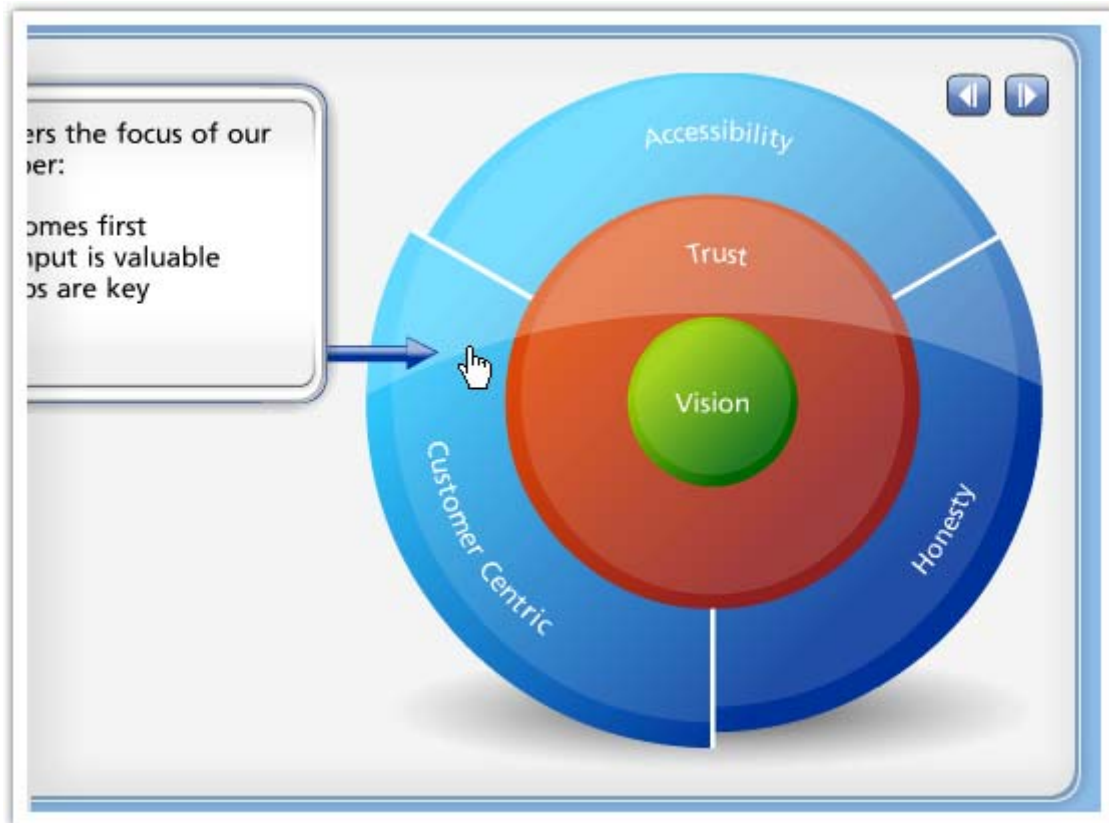

## Customizable, feature-rich Player

Put your audience in control with our unique player, which lets viewers easily navigate your content and access additional resources. Customize your project with your own logo, layout, navigation options, color schemes, and language to provide a unique branded experience.

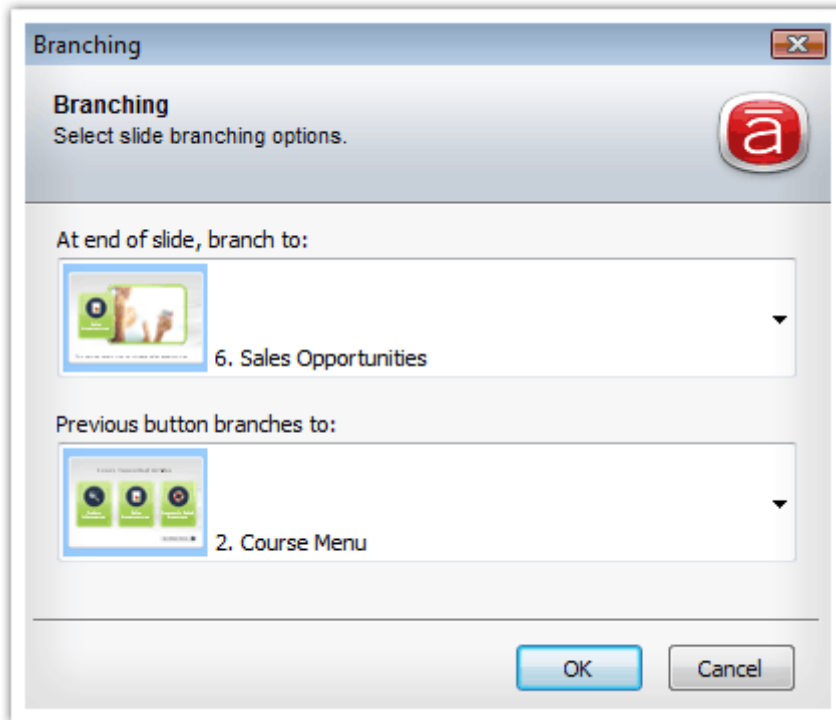

## Add multimedia and interactivity

Seamlessly incorporate Engage interactions and Quizmaker quizzes, video, Flash, and more. You can even embed live web pages for learners to use inside your presentation.

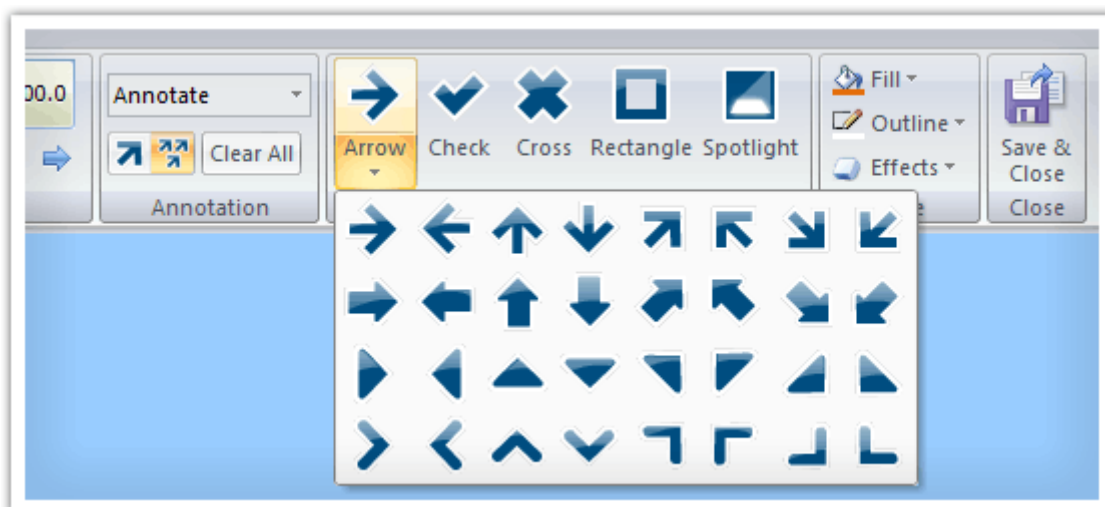

## Sophisticated branching

Involve your learners in realistic scenarios with powerful branching. Send learners to different slides depending on their choices, and hide as many slides as you want.

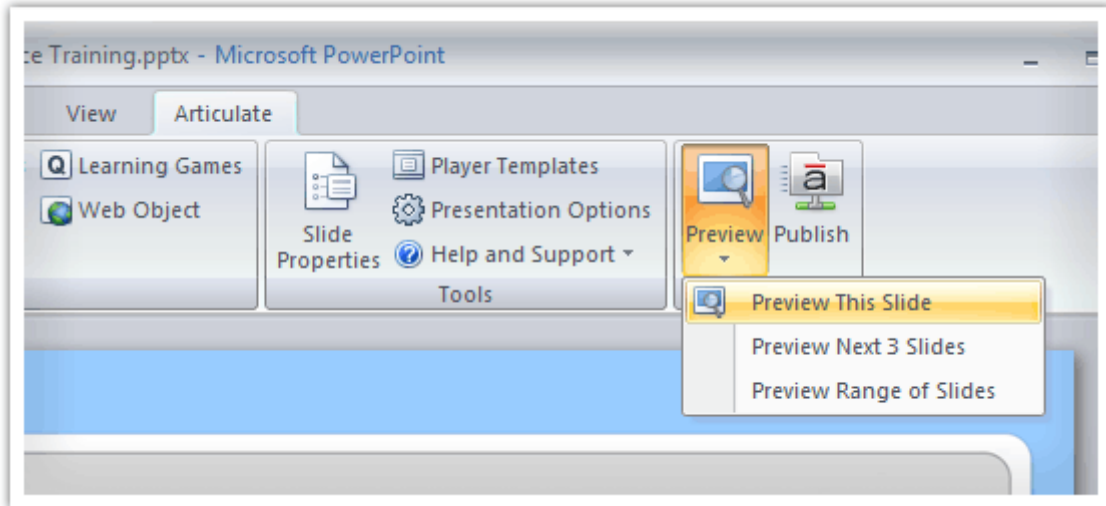

## Add professional annotations

Easily add polish to your presentations with professionally-designed annotation shapes and spotlight effects. Choose the perfect size, animation type, color, and more.

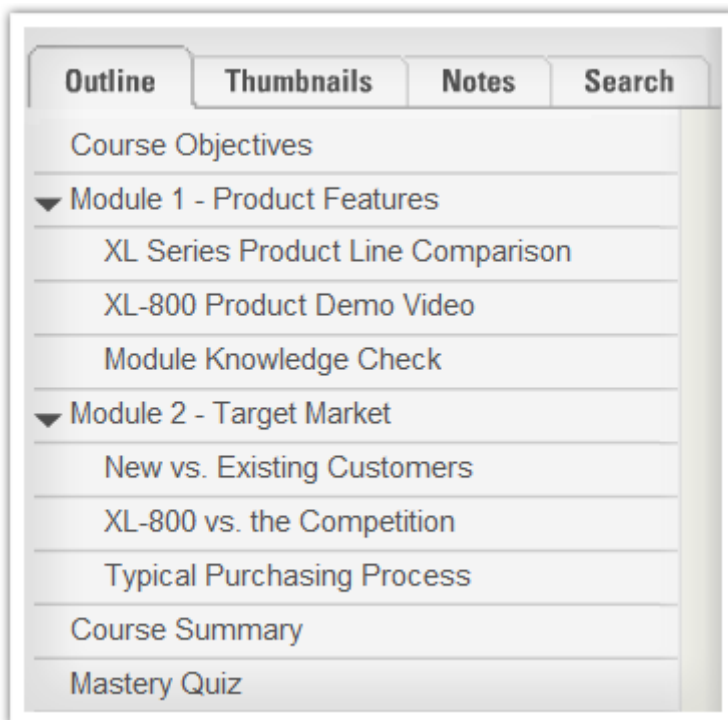

## Single-slide preview

Publish just one or a few slides at a time. You don't have to publish your entire presentation to see your recent changes.

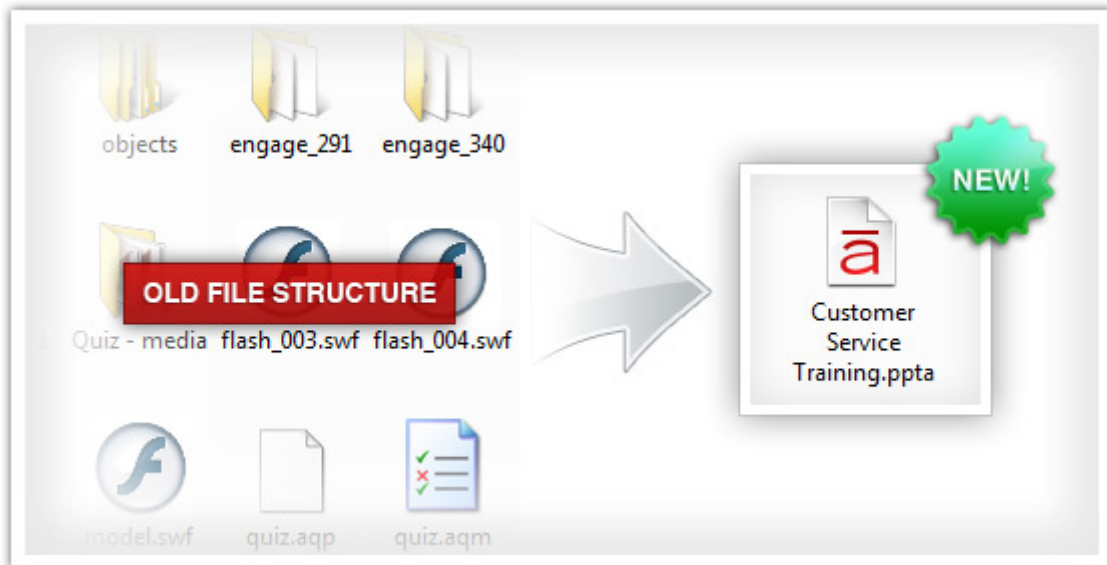

## Multi-level navigation

Have your menu show exactly how your content is organized—arrange your slides into sections and topics.

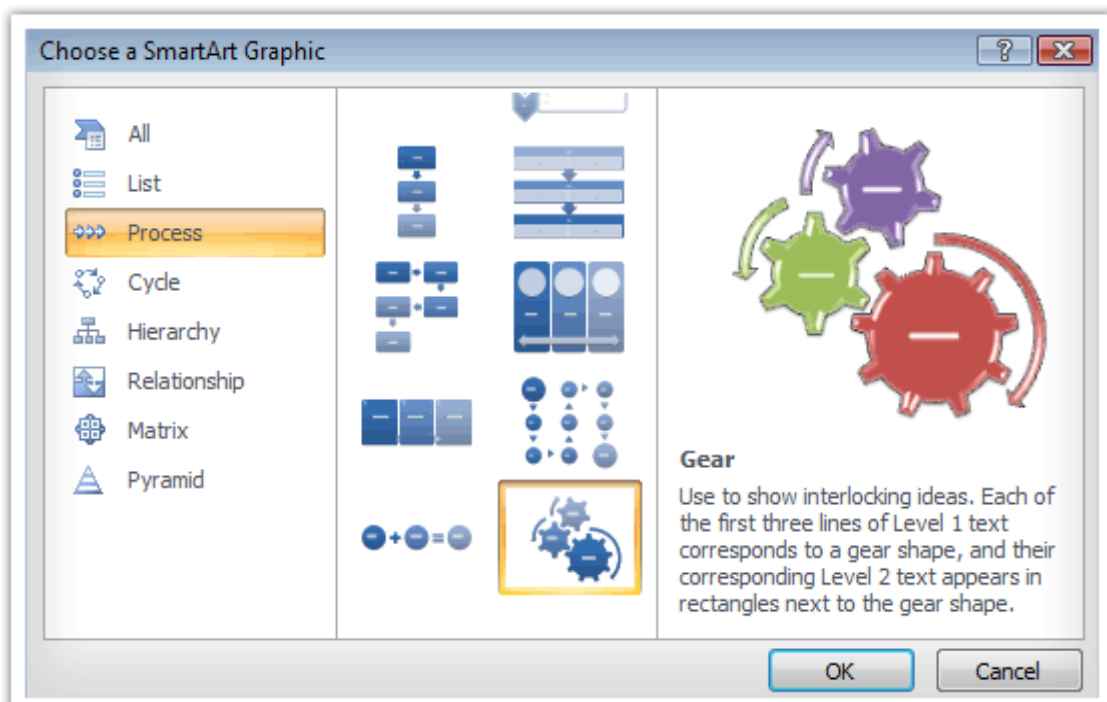

## Manage projects easily

Presenter '09 safely stores all your production files in a single .PPTA file, unlike other tools that hassle you with a folder of files that you have to maintain. Managing projects can't get much easier.

## Use the latest PowerPoint features

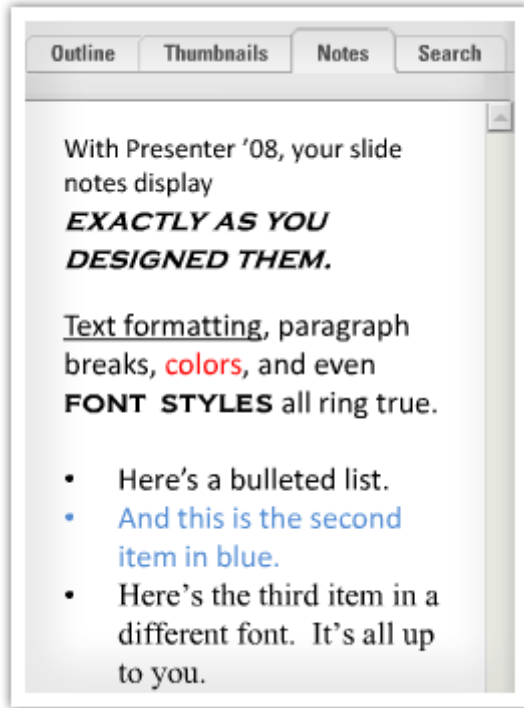

Presenter '09 works great with PowerPoint 2000 and later. And PowerPoint 2007 users will be able to take advantage of PowerPoint 2007's coolest new feature, SmartArt. Presenter '09 even lets you animate SmartArt object by object.

## Add style to your notes

Your slide notes display exactly as you designed them. Text formatting, paragraph breaks, colors, and even font styles all ring true.

## Multi-lingual support

Reach a wide audience by customizing your content for nearly any language. Select from one of the 11 built-in languages, or enter your own with the customizable multi-lingual support.
